

Impact Sockets

ACTION

Action: Tools For Professionals

Action Impact Sockets are specifically engineered for professional use with impact tools.

Action employs the best design, material, processes and quality control in the industry.

Action: Best Material, Superior Process

Action Impact Sockets are made of the best material (chrome-molybdenum alloy steel) to meet the extreme requirements that professional users require from their tools. Action uses a drop forge process to form our Impact Sockets followed by precise heat and surface hardening treatments to deliver unsurpassed material strength, hardness and superior surface durability.

Action: World Class Quality

Action Impact Sockets are World Class products which meet Federal Specifications GGG-W-660A and DIN 3121 & 3129. Our independent quality control program uses the latest technology and statistical tools to assure that each Action Socket matches World Class standards; hardness, function and torque are all spot tested. Action Impact Sockets are all warranted against defects in materials and workmanship for the life of the product.

Action: We Have The Tools You Need

Action Impact Sockets are available in every popular drive, size and configuration including:

1/4", 3/8", 1/2", 3/4", 1", 1-1/2", and 2-1/2" drives, #5 Spine drive as well as all popular sizes in SAE, Metric and Star Sockets for Torx nuts, Action also has long experience in producing special size tools based on customer specifications, samples or drawings. If the tool you needed is not in this catalog, we can make it special for you with the same quality and attention to detail that you get from all Action products.

The Specifications in this catalog are given as general information and are not binding. Due to a policy of continuous improvement, ACTION TOOLS reserves the right to modify specifications without prior notice.

WARNING- ATTENTION REQUIRED!

In order to obtain accurate torque, the following procedure must be followed. Failure to follow this procedure could result in injury or death.

Using your Torque Limiting Socket

In order to obtain accurate torque you must allow Torque Limiting Socket to tighten the fastener completely. This is accomplished by allowing Torque Limiting Socket to tighten to the point where the fastener stops moving. Do Not stop before that point and Do Not tighten beyond where the fastener visibly stops moving. A good rule for consistent results is 2.5 seconds of impact time on the fastener. Failure to observe all procedures will result in inaccurate results.

Calibrating Your Impact Gun

Torque Limiting Sockets are calibrated with a 1/2" impact gun rated at 250 ft. lbs. with 90-100 psig of inlet pressure.

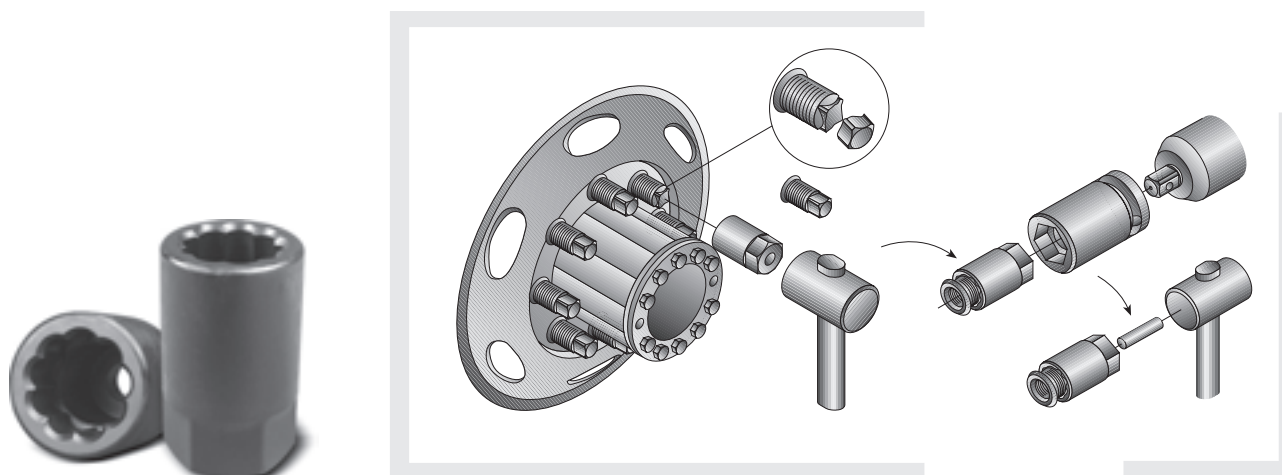

1. Tighten the fastener with one Torque Limiting Socket (for example try an 80 ft. lb. Torque Limiting Socket.)
2. Measure the break away torque in the tightening direction of the fastener with a dial type torque wrench. If the reading is above 80 ft. lb. turn the impact gun dial down one notch.
3. Repeat the above procedure until the fastener, Torque Limiting Socket and torque wrench are in sync. Your impact gun is now calibrated for any of the Torque Limiting Sockets that you choose.
4. Each time you use a Torque Limiting Socket, remember to reset the impact gun and inlet pressure to the determined settings. Any time you change your impact gun, air lines or compressor, you should re-calibrate your impact wrench.

- ⚠ **Do not** exceed 90-100 psig, operating pressure at the tool inlet while using Torque Limiting Socket.
- ⚠ **Do not** use an impact wrench exceeding 250 ft. lbs.
- ⚠ **Always** wear safety goggles, face, hand and body protective equipment when using Torque Limiting Socket or an impact wrench.
- ⚠ **Do not** hold on to Torque Limiting Socket while in use.
- ⚠ **Do not** run Torque Limiting Socket while off the fastener.
- ⚠ **Do not** use Torque Limiting Socket for removing lug nuts.
- ⚠ **Always** follow the manufacturers specification for lug nut torque.
- ⚠ **Always** make sure all wheel, studs and mounting faces of the hub are free of damage and dirt. When necessary use a wire brush to remove all dirt and rust and replace all worn or damaged parts. After running the vehicle for a distance the lug nuts should be checked again for proper torque.

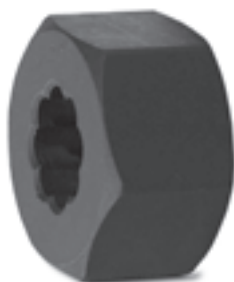

How ACTION Torque Limiting Sockets Work

ACTION Torque Limiting Socket is a torque limiting tool. When a lugnut is tightened with a Torque Limiting Socket and impact gun, the lugnut stops turning at the specified torque. This is possible because the shaft of the Torque Limiting Socket is made from spring steel and starts to twist when the impact gun tries to over-torque the lugnut. When the hammer inside the impact wrench stops and rotates for the next blow the shaft unwinds, this allows the fastener to stop turning at the correct torque while the drive end twists, advances and then retreats, limiting the torque delivered.

Order No.	Application
69775040	5/8" Wheel stud removal tool, Length 51mm
69775050	3/4" Wheel stud removal tool, Length 51mm
69776113	M25 / M26 - P1.5 wheel studs, Length 51mm

MEMO

Safety Rules

THIS SYMBOL INDICATES A
HAZARD ALERT WARNING

MANDATORY EYE
PROTECTION

Important Words About Safety for Users and Bystanders

These safety recommendations simply reflect good engineering practice and are not intended to be a comprehensive set of rules. They compliment, but do not replace standard precautions to be taken by every user in compliance with professional guidelines, company procedures or national regulations. Keep and follow all power tool manufacturers operating instructions and safety rules. Remember, all the rules in the world cannot replace good common sense.

- Always wear eye, face, hand and body protective equipment while using or near the use of any Impact Tool or Attachment.
- Use only Impact Sockets or Chisels that are in good condition. Worn Tools reduce impact power and could also shatter, resulting in personal injury.
- Always select the correct size and type of Tool for the job to be done.
- When using a Universal Joint, Adapter or Extension Bar, never operate the Tool off the work.
- Use only Socket Retaining Pins designed for that purpose. Never use a make-shift pin.
- Never continue to hammer with an Impact Socket once the Fastener is tight.
- Always use the simplest hook-up possible. Long Extension Bars and Adapters absorb impact power and could break loose, resulting in personal injury.
- Never modify an Impact Socket from its original design to accomplish a task for which it was not intended.
- Never strike an Impact Socket or Chisel with a Hammer or other hard object.
- Never hold a Socket, Chisel, Universal Joint or other Attachment in your hand while the Power Tool is running.
- Keep tools away from Children.
